-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The scope of claim 10 cannot be clearly understood. Claim 7 sets forth a hammer mounting apparatus, whereas claim 10 sets forth the mounting apparatus of claim 7 and a loader. This fails to further limit, and if anything brings features, i.e. the loader, to the claim which is outside the scope of claim 7. Perhaps claim 10 should be canceled.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Stormon (US 4,087,010).

Stormon's hammer mounting apparatus clearly shows a method of providing a main frame ("F" as designated in figs. 6 & 7), a slide assembly (11, 11') that includes a slide portion

Art Unit: 3721

(12) slidable relative to a fixed portion (9), providing a tool clamp (Ebert), a handle mounts (14), attaching the tool to the slide portion of the slide assembly, providing a flange (47, 48 fig. 6) and attaching mounting flange of the hammer mounting apparatus to a boom (7) of an equipment.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stormon (US 4,087,010) in view of L.A.Ebert (US 3,520,374).

Stormon discloses a hammer mounting apparatus, comprising: a main frame ("F" as designated in figs. 6 & 7), a slide assembly (11, 11') connected to the main frame ("F" as designated in figs. 6 & 7) including a fixed portion (9), a mounting flange (47, 48 fig. 6), a tool handle mounts (14), a loader mount (23) connected to the mounting flange and the apparatus is in combination with a loader (see figs. 1-4). Although Stormon is silent about tool being pneumatic tool, Stormon's tool is deemed to be a pneumatic tool.

Although Stormon does not clearly disclose upper and lower stops, it would have been obvious to one skilled in the art to provide the hammer mounting apparatus of Stormon with the upper and lower stops since the skilled artisan must maintain a traveling distance between the upper level and lower level of a movable tool.

Stormon lacks a tool mounting clamp. However, Ebert discloses a hammer mounting apparatus including a tool mounting clamp (46 bracket) holding the tool and connected to a slide

Art Unit: 3721

assembly (24). Therefore, it would have been obvious to one skilled in the art to provide the hammer mounting apparatus of Stormon with a tool mounting clamp in order to effectively hold the tool to a position.

***Allowable Subject Matter***

Claims 7-9 are allowed.

***Conclusion***

Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
